Frequently Asked Questions (FAQs)

Q1: How often should I change my Vita Spa filter?

A1: The frequency of filter changes depends on several factors including usage frequency, water chemistry, and the type of filter. However, a good rule of thumb is to replace your filter every 3-6 months, or as indicated in your owners manual. Regularly cleaning your filter extends its lifespan, but ultimately replacement is necessary for optimal performance.

Q2: What chemicals do I need to maintain my Vita Spa water?

However, you'll generally need a sanitizer (typically chlorine or bromine), pH increaser/decreaser, and alkalinity increaser/decreaser to maintain a balanced water environment. Your Vita Spa owners manual should provide detailed guidance on maintaining your spa's chemical balance. Always consult local regulations on the permitted chemicals and their quantities.
